

### **Fast Flirting Texts**

1. "I want you"

This one is simple, straightforward, and brutally effective. Follow it up with... nothing. Let her simmer in her own fantasy until you meet up with her again.

2. You have 20 seconds to make me hot... Go.

Every so often, it's a good idea to throw a command at her like this. Just don't play this card too often. She'll start thinking you're just after sex. Just be responsive to what she sends you.

3. I'm cold...know anything that can warm me up?

4. Stop thinking about me! (I can't get any work done...)

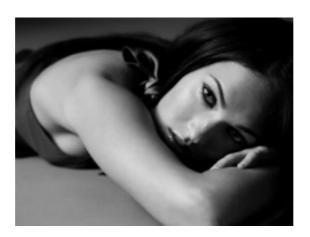

You can leave off the last part in parenthesis if you like.

5. Do you believe in love at first sight or do we need to meet up tonight?

Use those emoticons when you can - but creatively. Think of combinations, too.

Remember that women LOVE to read into things, so leaving her a little uncertain of your meaning will work to your benefit.

7. I have a situation!... Can't stop thinking about you.

A lot of "PUAs" (pickup artists) and seduction gurus want you to think that you need to constantly be flipping the tables on women and appearing hard-toget.

The truth is that if you do that TOO much, you'll scare her off. She'll think she can't connect to you.

Connection is the most important part for her!

Right after that is the need to be worshipped and adored as a woman. So this text fulfills a HUGE fantasy of hers - that a man is thinking about her and obsessed with her.

8. If you were here right now, what would you do to me?

And the best reply to whatever she says is: "Mmmmmm....." Leave her wondering.

- 9. Just got out of the shower. You should be here to dry me off...
- 10. Been thinking about you...and it hasn't all been PG.
- 11. I know you're going to the gym, but save a little energy for me...
- 12. Caught a glimpse of your ass when you left this morning...

This one is good because you're not saying what you thought of her ass. If she asks, make her wait a little, then give her a little compliment. "Yum..."

- 13. I'll show you mine if you show me yours...
- 14. Been thinking about you all day. It hasn't been innocent...
- 15. I'm wearing those jeans you love... with nothing else...

16. Had a very naughty dream about you last night...

Again, you're creating a burning curiosity in her. She will do anything to know what it was about, etc.

17. I know you're busy, but you should add one thing to your to-do list - Me.

### Text message flirting with women - the right and wrong ways to do it.

Any guy can use the power of her thumbs to seduce a woman and make her think about him and crave him more.

To text message flirt effectively, every guy must know the right way and the wrong way to do it. Text messaging is VERY different than almost any other form of communication.

It can be more powerful than a phone conversation and an email exchange combined - *if you use it right*. **THE RIGHT WAY**

**SHOWING CONFIDENCE** - Every woman loves to see confidence in a man that she is dating or curious about. Here's a text that you can send her right after you meet her - and you'll get her thinking about the next date:

"Stop drooling. You'll see me again soon 😐"

This works effectively because it assumes that she is attracted to you and she is thinking about you. It shows a ton of confidence it will get her attracted even more!

**THE VULNERABLE TEXT** - This type of text message will show a little bit of your vulnerable side. This is good, because women love to see some vulnerability in men - and they NEED to see it in you to feel safe around you. This can be used right after a date, but should be adapted to your specific situation.

"Wow - that was a great time... My favorite part was when you touched the small of my back after we left. It sent a little chill up my spine. I wonder what will happen next..."

**THE TEASE** - There is no better way to find out what she's thinking than teasing the information out of her. This one is super simple - and very effective:

"If you were here right now . . . :-)"

Don't say anything else. Let her mind run wild on what would happen if you were there. If she responds with something dirty then you can respond back with something like:

"Hey... I thought we were just friends... "

Remember that you want to use the power of "push-pull" to dial up the sexual tension between you and her. When she pulls in, you push her away - playfully. When she pushes away, you draw her back in.

### Some other teasing texts:

"You're thinking something naughty, aren't you..."

"That's so naughty..."

"You want me to WHAT...? "

"Hey, I'm not like those other guys..."

"What's your favorite position?" And before she can reply, you say: "No, silly, I meant YOGA... ""

**WHO ARE <u>YOU</u>** - This kind of text should be simple questions that she can answer in a sentence or two. You do not want them to be too personal and you want them to be something that she can easily answer.

### Here are a few examples:

"If you could be anywhere in the world right now - where would you be?"

"What's the single most badass thing you've done in the last 10 minutes?"

"If you found out a guy had done hard core prison time how would you feel about him?" (OK, that's kind of a tease.)

Just keep it light and fun and see where it goes!

**The Anticipator** - These types of text messages can be used before a date to build up anticipation and desire. This is practically *mandatory*.

If used effectively, this type of text message flirting will have her all over you by the time she sees you.

### Here are a few examples of these types of texts:

You: "When I see you tonight I'm going to . . ."

Her: "What?"

You: "Oh, you'll find out . . . =-)"

"You can't even imagine how it's going to feel when I . . ."

Make sure not to give her all of the information or she will have nothing to anticipate. Leave her hanging on the edge so that she begs for more.

### **BAD TEXTING**

The "Huh?" Text- This type of message has no substance to it and doesn't tell her what you want from her.

### Here are a few examples:

- "Hey"
- "What's up?"
- "What's going on?"

Your goal is to *drive up her attraction for you* through text, so make this text accomplish something. Make your text part of a conversation and part of a story. Stir up emotions, make it exciting for her to read. At the very least, you must get her fantasizing and thinking about you - *curious*.

The Story of My Life - Don't send messages that are long paragraphs. This looks Try-Hard. Keep your messages <u>short</u>. Cut them down to only a sentence or two so that you don't end up with a huge message for her to read. Keep your texts as mysterious as possible so that she'll want more. (This is the number one rule of texting!) If you tell her everything all at once, then she's got no reason to want to see you or talk to you again right away.

**Nude Pictures (AKA "Sexting)** - Taking naked pics of yourself and sending them to her can really inspire her *if she's already pursuing you*. But you don't want

your dick ending up on some freaky site on the internet.

If you feel like you really want to send some sort of sexy naked picture to a girl then be sure to *leave your face out of it*. Or any other kind of identifying information. I can't tell you how many times I've seen this go wrong.

The best way you could do this would be to send her a picture of a very particular part of your skin that she <u>can't</u> figure out. Send that to her with a challenge to figure out where it is on your body.

Again, this is something you need to wait to do for MUCH later.

The Needy Text- Never, NEVER, NEVER send a girl a text that makes her think you're clingy or needy. That's a huge turn off that will make her pull away from you fast.

### Here are a few examples of needy texts:

"Where are you?"

- •"Why didn't you call me?" or "Why didn't you reply to me...?"
- •"What are you doing right now?"
- •"Are you on a date with someone?"
- •"Who are you out with?"
- •"Do you like him more than me?"

If you want to test a message that you're getting ready to send, then send it to a female friend and ask her how she would feel if a guy sent her a text like that and see what she thinks.

That will give you the most accurate reading on whether it's a good one or a text that will freak her out, make her run for the hills, or anything else that would create an adverse reaction. If it does, delete it.

And don't send anything to the girl you were going to send it to.

You probably sense and know when you're in a "needy" kind of mood. This is just the worst time to do or say anything to a woman. You don't want to make too many withdrawals from the emotional trust account.

#### THE RULES OF TEXTING:

1.Be Creative

Chances are, she's seen a ton of texts from other guys. Even guys she wasn't dating.

So the more you can stick out in her mind, the better it will be for you.

- Make her laugh
- Make an observation
- Make her think

### 2.Ask Open ended questions

The big mistake a lot of guys make is to text yes/no questions like:

"Was the party fun last night?"

or

"Are you thinking about me...?" (that one is a bit on the needy side, by the way.)

Ask questions that inspire her to tell you details. But not too much, after all, texting can feel like a chore when she's got to explain everything that happened on her vacation.

#### 3. Never drunk text

This one goes without saying. Alcohol makes you text some really dumb stuff. Just turn off your phone. You'll thank me in the morning.

#### 4. Let HER have the last text

This way you're never left wondering why she isn't responding. It's just common sense that if you're prone to bouts of obsessive wondering, *don't put yourself in that position.* 

And it has the wondrous effect of making her think about you and why *you* aren't responding. The shoe's on the other foot now, chick...

#### 5. Never tell too much

Always leave the messages very vague and nebulous when it's the playful stuff. If it's logistics on where and when you're doing something, then you should be very up front and specific.

Don't explain everything. The more you leave up to her imagination, the better.

#### **6.The Least Effort WINS**

That's right. I know you're tempted to scream out all kinds of shocked and offended things at me, but here's the brutal truth: **The person who loves the least has all the power in a relationship.** 

And, **NO** - we are not trying to make this a power game here.

But if it comes down to you putting in a ton of effort, her putting in very little... and then having her disappear - and you don't get laid...

**OR** - you keep the right amount of aloofness to stop her from pulling that usual chick-crap that makes you

- A) pissed
- B) frustrated
- C) depressed

How would you rather have it?

Yup, thought so.

The fact is that "try-hards" always turn us off. Women who try too hard with you are a turn off, am I right?

So don't do that to her.

Let the desire naturally come to a fever pitch instead of blowing the flame out before it has a chance.

### 7. Watch Your Grammar & Spelling

If you don't know how to spell it, don't send it.

#### 8. Stop before it loses its fun

Part of the "Leave them wanting more" rule. Plus, the longer you text, the more chances she has to either get bored, or leave you hanging.

#### 9. NO serious conversations in texts. EVER.

This is just asking for a breakup.

There's no tone (see #10) and the amount of interpretation and subtext you will read into nothing will cause you a ton of grief.

(Oh, and don't ever break up with a girl in a text. That's one of the most careless and heartless ways to handle another person's heart.)

10. Text = No tone.

Remember that there is no body language, no tone, and no way for her to interpret anything other than the LITERAL words you send her.

Remember that she's a woman, and you have to give her something to understand your meaning, or she will start making up all kinds of crazy, insecure meanings of her own.

You do want her to be curious, but you have to remember that her curiosity can be a double-edged sword.

### **HIGH POWER TEXT RESPONSES**

These are some really potent texts that will really keep her on his toes.

#### 1. "Who is this?"

This one is really powerful. When she texts you something, and you send this back, she will panic just a little.

It's evil, but this will put her back in a frame of "winning you back" right away. She'll be back to square one and has to remind you about her "specialness."

Only use this if you think she's feeling a little bit "smothered." It will pull her out of her funk and get her back on the chase.

You can soften the blow by saying, "oh, it didn't show up as you" or something like that.

### 2. "Sorry, no signal. Call you tomorrow"

This one will put her in the hurt locker for a little while. It's great for those moments when you want to give her the gift of missing you. And, who knows... maybe you just need a little break?

You can always call her that night and reconnect.

### 3. "Good to hear from you"

This one is really good for a girl that you've been a little out of touch with, or took too long to respond. It implies that you haven't been waiting on her reply. It also implies that she was far back in your mind - and time has passed for you.

It also inspires her to text you back more to stay on the top of your mind.

### 4. "Thanks Sexy... XOX"

The key with this one is to use it all the time with her. Like it's your standard closing. And who else might you

be using this with? Hmm....

#### 5."Can't wait...!"

This one is truly a little bit evil... but it works.

Send it out of the blue. She'll send back: "can't wait for what...?"

You can either send:

- Nothing. Leave her hanging.
- "Sorry, that was for someone else..." (I told you it was a little evil, right?)
- "You know..."

### 6. You text, she calls you.

When she does this, don't answer. It's frustrating as hell for guys when women do this to us, which means you need to do it to HER every so often.

Remember, frustrating doesn't ever make a woman give up. (This is a big mistake guys make.) Used playfully and not overdone, frustration will make her camp out on your doorstep to see you one more time.

### 18 SHORT Sexy Text Messages:

- 1. You look hot today
- 2. I want to touch you
- 3. Wanna come play?
- 4. Thinking bout you right now
- 5. What are you wearing?
- 6. Can't wait to see you
- 7. Thx for last night
- 8. Guess what I'm wearing
- 9. Oh, you sooo sexy girl
- 10. Stop thinking about me!
- 11. So I think you talked to me first, and you texted me first does that mean you're stalking me?
- 12. At work having very NSFW thoughts about you...
  - (**NSFW** = "not safe for work." If she asks what it means, tease her about not knowing.)
- 13. Just got out of the shower. Too bad you can't come over and help me get dirty again
- 14. In 30 minutes I'll be getting off... Think about me while I'm doing it...
- 15. :-\*( gimme more than just a kiss on the cheek
- 16. I want you to \_\_\_\_\_ my \_\_\_\_ (Yes, use those lines to make little blanks for her)
- 17. Every time I think of you I feel naked
- 18. I think we should just be friends with sexual tension

#### **SECRET TRICK:**

I know this text flirting idea sounds a little wild, but give it a try...

Send her a blank text, and then see what happens. (You might have to just hit the space bar once or twice)

She will usually text back and say "I got a blank text from you. What's up?"

This is your opportunity to respond with: "Really?! My phone must have been hitting on you :)"

These texting tricks should do wonders to get her fantasizing and thinking about you.

The key is to remember how motivated women are by doubt and uncertainty. This is one of those areas that men need to leverage to keep her chasing <u>you</u>.

Remember - it's all about **what she doesn't know** that piques her curiosity for you.

And THAT is the goal!
